**DEPONENT**

**Joint Inspection Report of CPCB and UPPCB, Regional Office, Greater Noida regarding Industries running in area of Bisrakh Block and Chhapraula Village of Gautam Budh Nagar (O.A.No 228 of 2014 and M.A. No 768 of 2014 & M.A. No 139 of 2015 of Sri Yogesh Nagar Vs. Union of India & Others)**

**1. BACKGROUND**

A petition was filed in the matter of Yogesh Nagar Vs Union of India in Original Application no. 228 of 2014. The application relates to contamination of groundwater near Bisrakh block of Gautam Buddh Nagar. The petitioner mentioned that there are about 300 small & big industries in this area and are discharging their effluent either directly without any treatment or disposing it off through reverse Boring. Number of cancer cases were also reported in said area. The ground water of villages Khera Dhrampura, Bishnuli, Sadullapur, Sadopur, Achheja, Dujana, Chhapraula, Roja, Jalalpur of Bisrakh Block of Gautam Budh Nagar were reportedly contaminated.

**2. INTRODUCTION**

The District Gautam Buddh Nagar was formed on 06/09/1997 with effect from Govt. order no 1249/97/82/97 by carving out the portions of Ghaziabad and Bulandshahar. District Gautam Buddh Nagar includes Dadri and Bisrakh blocks carved out of gaziabad, while Dankaur and Jewar blocks have been carved out of Bulandshahar District. The district lies between 28°36'54" North latitude and 77°21'44" East longitude. The approximate area of the district is 1442 sq km (86007.30 hectare).

Gautam Budh Nagar is bounded by Delhi and Ghaziabad to the north and south, and Bulandshahar District to the east. According to the 2011 census, Gautam Budh Nagar has a population of 16,74,714. It is ranked 294<sup>th</sup> out of a total 640 Indian districts in terms of population. The population growth rate over the decade of 2001-2011 was 39.32%.

**3. OBJECTIVE OF JOINT INSPECTION:**

Objective of Joint inspection was to identify Polluting Industries, Closed Industries, and Industries running without any Permission/Authorization in Chhapraula area of Bisrakh Block Village of Gautam Budh Nagar and collection of effluent samples from the water polluting units in compliance of the Hon'ble NGT order to assess the industrial impact in the area in regard to ground water and stream water pollution.

**4. METHODOLOGY :**

- i) Dry inventory
- ii) Wet inventory

#### **4.1 Dry Inventory :**

Dry inventory was conducted jointly by officials of Central Pollution Control Board and U.P. Pollution Control Board, Regional Office, Greater Noida on May 6, 2015 for identifying Polluting Industries, Closed Industries, and Industries running without any Permission/Authorization in Chhapraula area of Bisrakh Block Village of Gautam Budh Nagar

#### **4.2 Wet Inventory:**

Effluent samples from 09 Water Polluting Units were collected jointly by Central Pollution Control Board and U.P. Pollution Control Board, Regional Office, Greater Noida during 19-24 August, 2015 in compliance of the Hon'ble NGT order.

The team Comprised of the following officials:

1. Sri Abhey Singh Soni, Scientist D, CPCB Delhi
2. Shri Praveen Kumar, Regional Officer, Greater Noida, UPPCB
3. Shri Utsav Sharma, Asstt. Env. Engineer, UPPCB, Greater Noida
4. Shri Kisan Singh JE, UPPCB, Greater Noida
5. Ms. Alka Srivastava, SSA, CPCB, Delhi

Earlier CPCB team during December 2014, collected **21 samples of groundwater** of villages namely Sadopur, Sadullapur, Achheja, Dujana, Bisrakh Block, Jalalpur, Chhapraula, Khera Dhrampura and Bishnuli.

#### **5. Observations:**

The Joint team visited the area and inspected around 48 various types of units running in area of Bisrakh Block, Chhapraula, Acheja, Dujana, Dhoonmanikpur, Ranuali, Bisnauli Bheel Akbarpur of Gautam Budh Nagar and collected the relevant information/statutory compliance status. As per records with UPPCB, 09 units are highly water polluting and attempts were made to collect effluent samples from these 09 units. The specific requisite information of 48 units and analysis report of effluent samples of 09 units has been incorporated in Tabular Form at Annexure-1 and Annexure-2.

The Overall Salient Observation of the inspecting team are given below :

- The area comes under Tehsil Dadri of Dist Gautam Budh Nagar . The area has mixed land use with dense population and Industries are situated in a scattered way in the notified industrial area of Greater Noida Development Authority.
- There are around 137 units in the area (as per the list submitted in the Hon'ble NGT by R.O.UPPCB, Greater Noida).
- Out of 137 units, 30 are of Red category, 29 are of Orange category and rest 78 are of Green category units.
- Out of 137, total Number of water polluting units are 16,out of which 09 units as per records with UPPCB are highly water polluting whereas 07 water polluting units are very small and quantity of water consumption and discharge is very less. 45 units are Air Polluting units.

*Rajeev*

*H*

- Rest comes under Green Category and which are Non Polluting in Nature (Dry Process of Fabrication, Assembling, Repairing etc.). However majority of the green category/non-polluting units were found to be running without Consent to Operate from UP Pollution Control Board (UPPCB) and even without Consent to Establish.
- 18 industries out of 137 are closed as per records of UPPCB.
- Some of the units named in the Petition, are found non existing.
- Most of the Industries are in Small Scale Category.
- The units which are having valid Consent to Operate from UPPCB were found to have adequate Effluent Treatment Plant and Air Pollution Control Devices and were found operational at the time of inspection.
- Area has become densely populated over the years but till date no sewerage / drainages system has been layed down in the area due to which domestic effluent from different villages is seen getting collected in low lying area & seeping in to the ground water which might contaminate the Ground water.
- No potable water supply system has been provided by the concern civic authorities to meet the drinking water demand, hence entire area is dependent on the individual borewell.
- No Reverse Boring was found in any of the industries inspected.
- Industrial and domestic effluent of the entire area is being discharged through Dasana & Dhoom Dujana drains, which eventually meets Hindon River.

#### 6.0 FINDINGS:

**Findings of the Joint Inspection is as follows:**

1. The concentration of BOD, TSS,COD, Fe and Zn are exceeding the limit in some of the units listed at Annexure-1.
2. In the Ground water monitoring of the area following important findings are made:  
**Details of the sampling location and Results of analysis of groundwater samples (Attached at Annexure-3).**
  - i. All groundwater samples are meeting the desirable range of pH i.e 6.5-8.5
  - ii. With respect to total dissolved solids, 06 samples (GW3, GW7, GW8, GW11, GW12 and GW17) collected at village namely Sadullapur, Dujana, Jalalpur) are exceeding the desirable limits and remaining 15 samples are meeting the desirable limits of 500 mg/l.
  - iii. With respect to total alkalinity and hardness, all groundwater samples are exceeding the desirable limits.

- iv. Chlorides, Sulphate and Fluoride are found within the desirable limits in all groundwater samples except at sample location GW8 i.e Handpump of Shri Jaipal's House Village Dujana.
- v. Calcium is exceeding the desirable limit of 75 mg/l at 08 locations (GW2, GW3, GW8, GW9, GW10, GW11, GW12 and GW17).
- vi. Nitrate concentration is exceeding at 04 sampling locations (GW2, GW7, GW8 and GW10).
- vii. With respect to Bacteriological parameters, total coliform and fecal coliform count is found at 05 sampling locations (GW1, GW3, GW4, GW6, GW8 and GW9).
- viii. Pesticides concentration is not traceable in any of the sample.
- ix. Cadmium, Arsenic, Chromium and Nickel are below detectable limit in all 21 samples. Lead was found only at one locations i.e GW17.
- x. Iron concentration at 12 sampling locations (GW2, GW3, GW4, GW5, GW7, GW9, GW10, GW11, GW14, GW17, GW19 and GW21) is above the prescribed limits.

#### **7.0 Conclusion:**

- i. There are 137 units in the area out of which 30 are of Red category, 29 are of Orange category and rest 78 are falling in Green category .
- ii. All the units which are having valid Consent to Operate from UPPCB were found to have adequate Effluent Treatment Plant and Air Pollution Control Devices and were found operational at the time of inspection.
- iii. Some of the units are not meeting the limits in respect of pH, BOD, COD , TSS, Iron and Zinc, however these are not carcinogenic.
- iv. Presence of coliform bacteria is observed in groundwater samples of Village Sadapur, Sadullapur, Accheja, Dujana and Bisarakh block.
- v. Pesticides are not found in any of the groundwater sample.
- vi. With respect to total alkalinity and hardness, all groundwater samples are exceeding the desirable limits.
- vii. Iron Concentration is above the prescribed limits at Village Sadapur, Sadullapur, Accheja, Dujana, Bisarakh, Jalalpur, Chapraula, Kheda, Bishnuli.

#### **8. Recommendations:**

Based on the above observations and findings following recommendations are made:

- i. UPPCB should take appropriate action under the Environment (Protection)Act, 1986 against the units which are operating without Consent

- ii. Units which have installed resin manufacturing (Red Category) process without obtaining Consent to Establish from UPPCB should not be allowed to operate without obtaining requisite permissions from UPPCB.
  - iii. Online Monitoring system need to be installed by the water polluting units, listed at S.No. 1,2,3,7 and 8.
  - iv. A Strict Vigil and more frequent Inspections of the Units by the UP Pollution Control Board may improve the condition of the area.
  - v. Proper potable water system need to be provided by the district administration to avoid illegal boring in the area.
  - vi. Proper sewerage system / drainage system need to be developed in the area to avoid seepage / percolation of contaminated water in the Ground water.
  - vii. For Godowns and other such Establishments (Marriage Hall, Farm House, Ware House etc.) operating in the area the matter may be taken up by District Administration; especially with regard to permissions and No Objection Certificates from different departments for discharging domestic sewage treatment/discharge facility and handling of solid waste generated.
  - viii. Recommendations for individual units as given in Annexure-1 need to be implemented by UPPCB.

Annexure-3

Groundwater samples location details

Sl. No	Code	Source	Sampling Date and Time	Location	Depth
1.	GW1	Groundwater	08-12-2014	Jal Nigam Village Sadapur	110 Ft
2.	GW2	Groundwater	08-12-2014	Handpump of Shri Rajpal Singh Tonger Village Sadapur	50 Ft
3.	GW3	Groundwater	08-12-2014	Handpump of Shri Jagveer Village Sadullapur	60 Ft
4.	GW4	Groundwater	08-12-2014	Jal Nigam in front of Shri Anmol's House Village Sadullapur	120 Ft
5.	GW5	Groundwater	08-12-2014	Handpump of Shiv Mandir Village Achheja	150 Ft
6.	GW6	Groundwater	08-12-2014	D.R Convent School Achheja	60 Ft
7.	GW7	Groundwater	08-12-2014	Handpump of Jal Nigam, Parmal Pradhan House Village Dujana	120 Ft
8.	GW8	Groundwater	08-12-2014	Handpump of Shri Jaipal's House Village Dujana	45 Ft
9.	GW9	Groundwater	08-12-2014	Handpump of Jal Nigam Pankaj Hotel & Restourant Bisrakh	110 Ft
10.	GW10	Groundwater	08-12-2014	Handpump of Jal Nigam in front of Bisrakh Nagar Market	120 Ft
11.	GW11	Groundwater	08-12-2014	Handpump of India Marka Roja Jalalpur	110 Ft
12.	GW12	Groundwater	08-12-2014	Borewell KRBL Ltd. Near Canteen	100 Ft
13.	GW13	Groundwater	10-12-2014	Goel Sweet & Restourant Chapraula GT Road	90 Ft
14.	GW14	Groundwater	10-12-2014	House No. 182 Chapraula GB Nagar Shri Brij Lal Singh	120 Ft
15.	GW15	Groundwater	10-12-2014	M/s KV Metal Industries, Bisrakh	160 Ft

Sl. No	Code	Source	Sampling Date and Time	Location	Depth
16.	GW16	Groundwater	10-12-2014	Road Ghaziabad Chemical Industrial Area Plot No. 16 A Khasra No. 989 Bisrakh Road Ghaziabad	160 Ft
17.	GW17	Groundwater	10-12-2014	Shri Krishan Properties Near RS International Public School	160 Ft
18.	GW18	Groundwater	10-12-2014	Sidh Baba Mandir Dharampura Kheda	120 Ft
19.	GW19	Groundwater	10-12-2014	Dharampura Kheda Oppt. Company Bagh	120 Ft
20.	GW20	Groundwater	10-12-2014	Rakesh Kumar Near Prashant Traders Bishnuli	60 Ft
21.	GW21	Groundwater	10-12-2014	Jagdish Bishnuli	100Ft

**ANALYTICAL RESULTS OF GROUNDWATER**

Analytical results of Groundwater samples w.r.t Physio-chemical parameters

Ground Water Sampling Point	pH	Cond.	TDS	Physio-chemical								Bacteriological			
				Total Alkalinity as CaCO <sub>3</sub>	Total Hardness as CaCO <sub>3</sub>	Calcium as CaC <sub>2</sub> O <sub>4</sub>	Magnesium as C <sub>2</sub> O <sub>4</sub>	Chloride as Cl	Sulphate as SO <sub>4</sub>	F	Nitrate as NO <sub>3</sub>	Nitrite As NO <sub>2</sub>	Total Coliform (MPN/100 ml)	Coliform (MPN/100 ml)	Fecal Coliform (MPN/100 ml)
BIS Drinking water standards IS 10500:2012 (Desirable limit)	6.5 -	8.5	-	500	200	200	75	30	250	200	1.0	45	-	Shall not be detectable in any 100 ml

	8.5													

Note:

ii) All the concentrations are expressed in mg/l except of pH, colour (Hazen units) and conductivity (μmho/cm)

iii) Bold red coloured values are exceeding the prescribed norms

Table 4: Analytical results of Groundwater samples-Heavy Metals and Pesticides

Ground Water Sampling Point	BIS Drinking water standards IS 10500:2012 (Desirable limit)	Heavy Metals						Pesticides							
		Cd (mg/l)	Cr (mg/l)	Cu (mg/l)	Fe (mg/l)	Mn (mg/l)	Ni (mg/l)	Pb (mg/l)	Zn (mg/l)	As (µg/l)	Total BHC (Ng/l)	Aldrin (Ng/l)	Total Endosulfan (Ng/l)	Dieldrin (Ng/l)	Total DDT (Ng/l)
